

COUNTRY FACT SHEET

SLOVAKIA

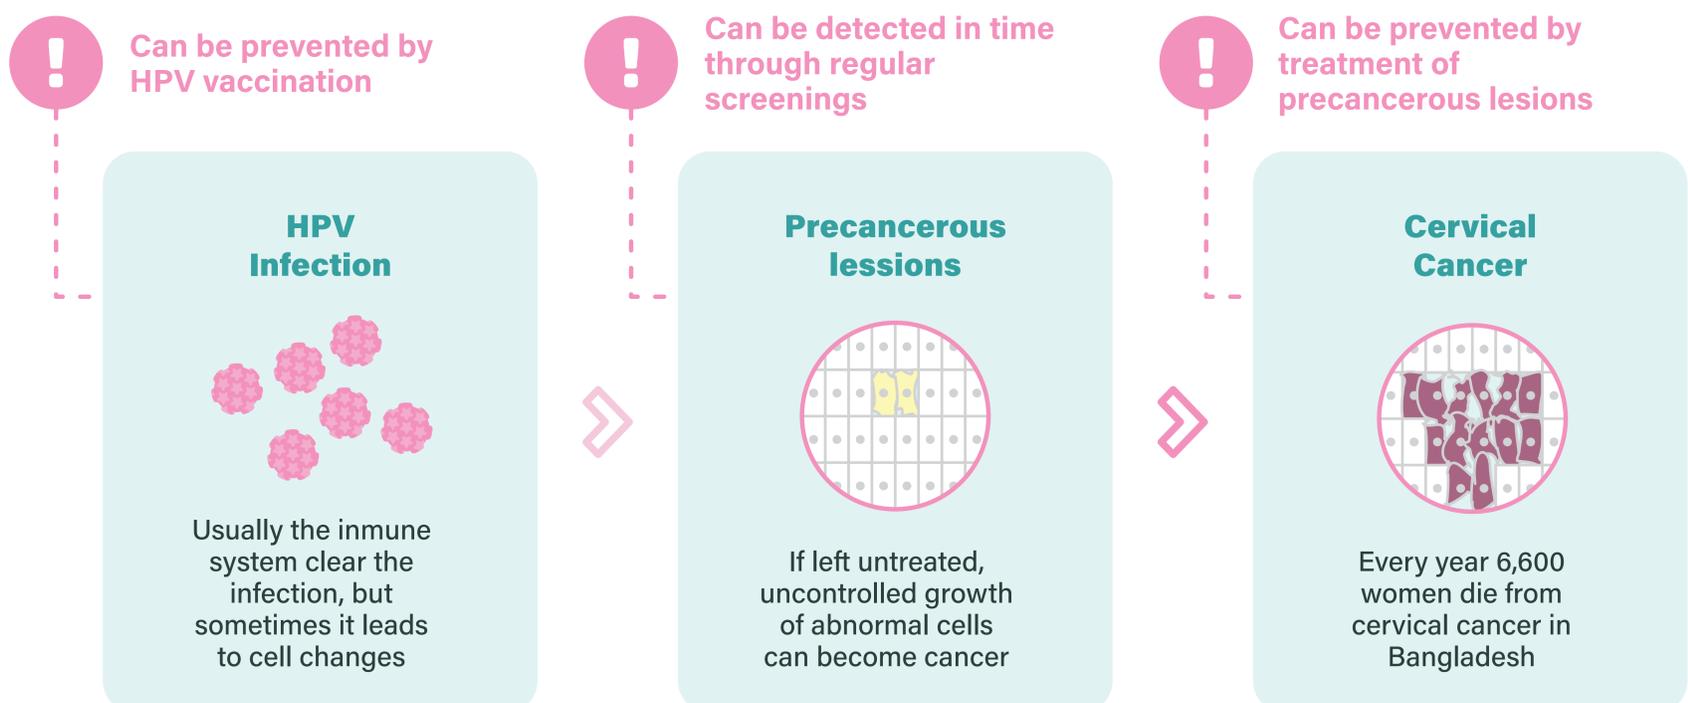

Each week, approximately five women die from cervical cancer in Slovakia. This should not happen because we have all the tools we need to prevent it.

Nearly all cervical cancers are caused by an infection with human papillomavirus (HPV) not successfully controlled by the immune system, which lead to cell changes that, if untreated, become cancer.

The avoidable path to cervical cancer

Funded by the European Union

To eliminate cervical cancer as a public health problem we need:

What is PRESCRIP-TEC doing in Slovakia?

Informing and sensitising women about the screening process for higher accessibility and acceptability of the screening programs.

Facilitating self HPV testing at home to make things easier for women living in remote areas.

Introducing artificial intelligence in the gynaecological examination to improve diagnosis precision and to make work easier for health workers.

Providing women who need treatment of cervical lesions immediate assistance.

In Slovakia there are three leading partners working in PRESCRIP-TEC Project: **Trnava University** is responsible for the overall project coordination, along with scientific coordination, sample management and analysis. **Healthy Regions** are primarily in charge of community-related work. **League Against Cancer** oversees integration with existing national programs and strategies, and works towards increasing awareness.

Slovak consortium partners are also receiving assistance and expertise from the Ministry of Health of the Slovak Republic. Together they are working mainly in two impact areas:

- **Roma population** – Pre-selected around 32 villages as potential target areas, in three self-governed regions of Slovakia (Banskobystrický, Košický a Prešovský kraj).
- **Factory setting** – In the process of selecting

Contact us to join this winnable cause:

● **Trnava University:**

Hornopotočná 23, 918 43 Trnava

● **Healthy Regions:**

Kocel'ova 937/9, 821 08 Bratislava

● **League Against Cancer:**

Brestová 6, 821 02 Bratislava

Together we can end cervical cancer!
